RE: Application No. 09/928/014

Dear Ms. Person,

✓
In response to your call we suggest that color picture from this application would be presented in black and white mode.

Here is description of this picture:

insert
Photograph of the capillary dialysis column filled with colloidal silica Ludox TM-50 after pumping 4 liters of the distilled water contaminated with 32 milligram per liter cupric ion. Dark (blue) zone on the bottom of the column indicates presence of cupric ions at high concentration.

Yours truly,

Dr. Andrei Dukhin
President
